

(a) Fixed-grid information contract

$$\hat{V}[k+1] = (2P[k] - 3P[k-1] + P[k-2])/T$$

(b) Same position, different terminal state

P-only: $(p^*, 0, 0) \Rightarrow$ rest-to-rest

matched PV: $(p^*, v_{\text{ref}}, 0) \Rightarrow$ zero jerk

(c) Exact within-period profiles
